

Assignment 3 (v3)

The aim of this assignment is to focus on the proof-of-concept device to be developed in the next study module, Hardware 2. The assignment is completed as group work.

Tasks

1. Study the provided materials relating to project planning in the workspace:
 - a. Project plan template (Word)
 - i. Each section of the project plan template lists things that should be included.
 - b. Hardware 2 project requirements (Word)
 - c. Requirements specification (Excel)
 - d. Project timetable and schedule (GANTT) (Excel)
2. Discuss the requirements, schedule, and project plan with your team.
3. Write a project plan.
 - a. Write the project plan with full sentences, not a list.
 - b. You may include tables, lists, images, or diagrams.
4. Modify the provided GANTT template:
 - a. Add the names of your group members.
 - b. Review the predefined tasks and timelines and modify as needed.
5. Make revisions and keep the newest versions of the documents available until the end of Hardware 2.

Submission

Return the latest versions of the Project plan and Project timetable and schedule in the original format (Word or Excel) at the end of Hardware 1. Name the documents as follows:

- Project Plan:
 - o HT_A3_PLAN_Team_number/name.docx
- Project timetable and schedule
 - o HT_A3_GANTT_Team_number/name.xlsx

The generic criteria presented in the Health Technology Introduction slides are used for the evaluation.
